

Technology Stack

Date	01 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	<i>HTML5, CSS3</i>	<i>Used to create a responsive, interactive, and user-friendly interface for entering HDI indicators and viewing results.</i>

2	Backend / Server-Side <i>(e.g., Node.js, Python/Django, Java)</i>	<i>Python, Flask</i>	<i>Processes inputs and generates HDI predictions.</i>
3	Database / Data Storage	<i>SQLite, CSV</i>	<i>Stores application data and the HDI dataset.</i>
4	Cloud / Hosting / Deployment	<i>Local Flask Server</i>	<i>Runs and tests the application locally.</i>
5	Version Control & CI/CD	<i>Git, GitHub</i>	<i>Supports version control, backup, and collaboration.</i>

6	Third-Party APIs / Other Tools	<i>Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Pickle</i>	<i>Supports data analysis, visualization, model training, evaluation, and model saving. ject]</i>
