

Solution Architecture

Date	03 JULY 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Solution Architecture Diagram:

Provide a high-level visual representation of your solution's architecture. Use the structural layout below as a template to map out your Presentation Layer, Application Layer, and Data Layer. Fill in the specific technologies and components for your project directly into the boxes to create your architectural diagram.

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
<i>Presentation Layer</i>	<i>Provides the user interface for viewing project information, entering the four development indicators, and displaying the predicted HDI result.</i>	<i>HTML5, CSS3</i>
<i>Application Layer</i>	<i>Handles browser requests, form submission, input processing, routing, and communication between the user interface and prediction model.</i>	<i>Python, Flask</i>
<i>Core ML Service</i>	<i>Preprocesses input data, applies feature scaling, loads the trained model, predicts the HDI score, and determines the HDI category.</i>	<i>Scikit-learn, Pandas, NumPy, Pickle/Joblib</i>
<i>Data & Model Storage</i>	<i>Stores the HDI dataset, trained model, scaler, evaluation metrics, and generated EDA plots.</i>	<i>CSV, PKL, TXT, Local File Storage</i>
