

Code-Layout, Readability and Reusability

Date	03 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used through out the code	Yes	Consistent indentation is maintained throughout the code.
2	Proper File Structure	Files and folders are logically organized	Yes	Files are organized into dataset, model, templates, static, notebooks, and utils folders.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Variables clearly represent inputs, features, predictions, and outputs.
4	Function / Method Names	Functions are descriptively named	Yes	Functions use clear and descriptive names based on their purpose.
5	Code Comments	Inline and block comments explain logic	Yes	Important sections contain comments for better understanding.
6	Modular Design	Code is split into reusable functions/modules	Yes	Preprocessing, prediction, helper functions, and model training are separated into modules.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Reusable logic reduces unnecessary code duplication.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Invalid inputs and prediction errors are handled gracefully.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	preprocessing.py	Python, Scikit-learn	Data preparation and prediction	High

2	prediction.py	Python, Scikit-learn	Flask prediction workflow	High
3	helper.py	Python	Shared utility operations	Medium
4	model.pkl and scaler.pkl	Python, Scikit-learn	Reused for every prediction	High
5	HTML Templates and style.css	HTML5, CSS3	All web application pages	High

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	5	Clear and logically organized project structure.
Readability	5	Code is easy to understand and uses meaningful names.
Reusability	5	Modular components are reused across the application.
Documentation / Comments	4	Good documentation with scope for more detailed comments.
Overall Score	5	Well-structured, readable, and reusable codebase.
