

Project Executable Files

Date	03 JULY 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	NA

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

 HDI_Predictor/	
 app/	- Application modules and supporting code
 dataset/	- HDI dataset files
 docs/	- Project documentation
 model/	- Trained ML model, scaler and model-related files
 notebooks/	- Data analysis and experimentation notebooks
 static/	- CSS, images and visualization plots
 templates/	- HTML web pages
 tests/	- Application and model test files
 venv/	- Python virtual environment
 .gitignore	
 app.py	- Flask application entry file
 database.db	- SQLite database file
 main.py	- Main entry point (if used)
 README.md	- Project overview and setup guide
 requirements.txt	- Python dependencies list

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://a-comprehensive-measure-of-well-being-q33x.onrender.com/
Login Credentials (Demo)	User name :bhuvan@gmail.com Pass: bhuvan@gmail.com
Platform / Hosting Provider	Local Flask Development Server
Repository Link	https://github.com/AP24110010647/A-Comprehensive-Measure-of-Well-Being
Demo Video Link	https://1drv.ms/v/c/9d19371209c90c20/IQCvaVmueiF3Q5lpOfRiw3kMAeZSsgpJWvNJpvrAZ-tGv-Q?e=wGkOpy

Step 4: Run Instructions

Pre-requisites:

- Python 3.13.9
- Visual Studio Code
- Web browser
- Required Python packages

Step 1: Open the HDI_Predictor folder in Visual Studio Code.

Step 2: Open the terminal in VS Code.

Step 3: Activate the virtual environment:

```
.\env\Scripts\Activate.ps1
```

Step 4: Install the required dependencies:

```
pip install -r requirements.txt
```

Step 5: Start the Flask application:

```
python app.py
```

Step 6: Open the local URL displayed in the terminal:

```
http://127.0.0.1:5000
```

Step 7: Open the Predict HDI page.

Step 8: Enter Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per Capita.

Step 9: Click Predict to view the predicted HDI result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Prediction accuracy depends on the training data.	A larger real-world dataset can improve future performance.
2	Application currently runs locally.	Can be deployed to a cloud platform in the future.
3	Prediction uses four main development indicators.	More socio-economic indicators can be added in future versions.
