

Scalability & Future Plan

Date	04 JULY 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited training dataset	May reduce prediction accuracy for diverse countries	High
2	Application runs locally	Users cannot access the system online	High
3	Uses only four HDI indicators	Other development factors are not considered	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports local single-user access	Deploy on cloud to support multiple users
2	Data Storage	Uses local SQLite database	Migrate to a scalable cloud database
3	Performance	Prediction runs on a local server	Use optimized model loading and production server
4	Security	Basic local application security	Add HTTPS, input validation, and secure configuration

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 1	Cloud Deployment	1–2 Months	Enables online access from anywhere
Phase 2	Larger Real-World Dataset	2–3 Months	Improves prediction accuracy
Phase 3	Country Comparison Dashboard	3–4Months	Provides better development insights
Phase 4	Advanced ML Models and API	4–6 Months	Improves performance and system integration
